The school SSI is based on the one word – quality! Instructors SSI are allowed to teach only in SSI facilities, which conscientiously check their professional level. SSI instructors use their own highly effective method Comfort Through Repetition while teaching. Diving skills thus become your second nature. And this is essential in diving – not only to unwind and relax well, but also learn to know yourself better thanks to the water. SSI is the only organization in the market with such an extent of internal self-control and responsibility. It can be verified in more than 2000 facilities in more than 902 states all over the world.

The certificate acquired with SSI will be accepted, when you dive anywhere in the world.

SSI has an excellent reputation in Europe, also due to cooperation with several universities that included training courses of SSI into their study programs. Three programs for divers and two for instructors received certification according to EU standards already in 2005 (EN 14153-1 to -3 for divers and 14413-1 to -2 for scuba instructors). Owing to this fact, you can find the logo of quality EUF on the identity cards of SSI confirming quality of the offered services. As well as SSI is a leading organization in the market, it was also a founding member of the Recreational Scuba Training Council (RSTC). This long-time membership in RSTC and certification according to European standards represent the highest level of quality.
