

DIVING SPECIALIZATION

The program of diving specialities enables an extension of diving knowledge and skills by a choice of one or more specialities from the program, which SSI offers to you. These diving specialities include for example: diving at night and under limited visibility conditions, shipwreck diving, deep-water diving, navigation, diving from a ship and many others. The course consists of three special dives, a theoretical part and a final exam for each category. In the case of graduating from any five specializations, besides the advanced training you can also gain the highest licence of recreation diving - Master Diver.
